Versiflow, an economical, versatile product maximizing storage capacity and providing greater ease and speed for picking totes and cartons of varying widths.

### COMPONENTS

#### Wheels

1.9" diameter polycarbonate wheels provide a large radius for easy flowability. Wheels have a 1 inch wide rolling surface to provide excellent support for cartons or totes.

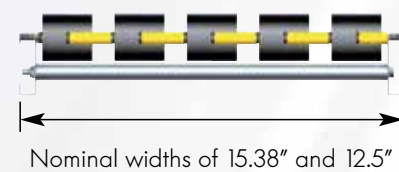

#### Galvanized steel axle

Galvanized steel axles on 2" or 3" centers ensure stability of load. Unit dimensions determine axle configurations.

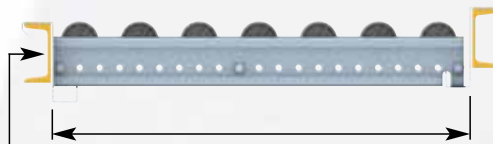

### Configurations

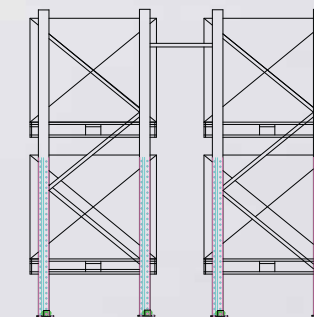

Nominal widths of 15.38" and 12.5"

Loading side Unloading side

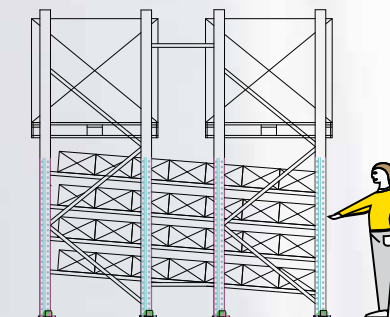

Versiflow tracks are available in any length – no splicing required even for long lengths.

Brackets are compatible with step beams, box beams, and structural beams.

Before – Static Racking

After – Interroll Versiflow

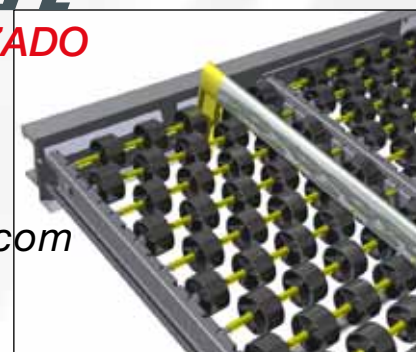

#### Guides

Interroll offers entry guides and full length guides to help the order picker.

Entry guide

Full length guide

A 90-inch track at 15.38" or 12.5" wide can handle loads up to 500 lbs.

### Why use Versiflow?

- Versiflow allows FIFO picking
- Versiflow offers full bay width access for various sizes of cartons or totes
- Strong polycarbonate wheels resist impact damage and provide long wear characteristics
- High density storage with up to 90% utilization of space
- Strong profile for superior load carrying over long spans
- No special tools required to install the system
- Tracks are delivered fully assembled
- Operating temperature -30°F to 104°F
